**DYNAWEB Inner and Outer Cover Stock for Face Masks**

The high performance barrier solution for all your medical needs.

**Product Features**
- Gentle to the skin, even during long operating periods
- Uniform covering for the filter media
- Highly breathable and smooth surface
- Depending on the layer, either splash resistant or absorbent
- Very light weight for yield advantage
- Available in white, blue or green fitting your medical background needs

**Skin Irritation**
The irritation response category of this fabric is classified as negligible. Tested according to ISO 10993-10 method “skin irritation test”.

**Skin Sensitization**
This fabric does not have the potential to be a contact sensitizer. The test has been carried out according to the ISO 10993-10 2002 method “closed patch test for delayed hypersensitivity”.

**Cytotoxicity**
This fabric meets the United States Pharmacopea requirements. The test has been carried out according to ISO Biocompatibility Guidelines using the Agar overlay method.

**Raw Materials**
All raw materials conform to recommendation Bfr 14 and 36.
