ROUND**one**

"Built to run on Every Machine"

One Carbonless. Digital and Offset.

ExcelOne™ Carbonless is GUARANTEED to run on all of your forms equipment. Whether you have an offset press, a high-speed copier, a digital duplicator or an inkjet copier, ExcelOne is the choice for you. Our product engineers have spent 2 years developing a sheet that provides both the unparalleled runnability you've come to expect from Glatfelter's offset paper Excel® plus the contamination-free digital performance of Xcelerator® PLUS.

ExcelOne performance is reliable and consistent thanks to our high fiber content. Each sheet we make contains high fiber content and less fillers, allowing us to provide this multi-purpose carbonless sheet WITHOUT having to raise basis weight. We promise to knock out the competition every time.

Even better? Not only is it built to run on every machine, but it keeps your inventory lean! One Carbonless. Digital and Offset.

ROUND**two**

"Clean"

We proudly introduce CleanPress™ CF technology on your new ExcelOne product. Not only does this new technology offer a cleaner CF sheet for both offset and digital applications, we also made it more environmentally responsible. CleanPress CF is manufactured in a more energy-efficient manufacturing process, decreased VOCs versus traditional CF grades and reduced solvent usage in wash-ups. Cleaner and greener is the Glatfelter advantage on carbonless.

 **GLATFELTER**

ROUNDthree

"Green"

NatureSolv® Capsule Technology + CleanPress™ CF + SFI® Chain-of-Custody Forest Certification = an Environmental Equation that beats the competition.

Glatfelter is a leader in environmental responsibility in the forms industry. Each ply of your form is greener thanks to our NatureSolv capsule and CleanPress CF technology—a green combination punch unavailable anywhere else. The addition of prestigious SFI Chain-of-Custody forest certification ensures that each sheet of ExcelOne Carbonless is guaranteed to be responsibly produced—giving you and your customers peace of mind that Glatfelter delivers green for the win.

Knockout Benefits

- 1. Runnability* Glatfelter has always provided an advantage in runnability on press, thanks to our high fiber content carbonless sheet. ExcelOne continues that tradition of excellence. Even better, our ExcelOne product offers excellent performance in all forms equipment without having to raise our basis weight—you get maximum runnability all in a 20# sheet. This provides ergonomic and shipping benefits to our customers as well.
- 2. Streamlined* Ordering from Glatfelter is now simpler than ever, with one product to buy and inventory. It is simpler for press operators also—no need to change papers when a job changes from offset to digital.
- 3. Brighter* ExcelOne Carbonless is now whiter and brighter than before. 92 bright, and a more blue-white shade makes for an even better looking sheet than ever.
- 4. Guaranteed* Glatfelter offers the confidence of our 100% Guarantee on ExcelOne. Feel free to use our carbonless paper on your equipment and know that Glatfelter stands behind it absolutely.
- 5. Easy* Glatfelter is making this change as easy as possible for you. No material number changes
