* Available product certificates depend on product composition

FROM LIGHTWEIGHT COMFORT TO FLEXIBLE STRENGTH

Our highly specialized hygiene solutions give you the freedom you need to create the products your market demands.

Baby Care

Our Baby Care product line is light in weight but high in performance because of our unique layering system that creates bulky and opaque substrates. Spunlace nonwovens can provide excellent extension characteristics to work with the stretchable films used in elastic laminates for baby diapers.

Feminine Care

Our customized components for period products stand out with our ultra-thin, highly absorbent layers and cores. These layers function as topsheets, secondary topsheets, acquisition distribution layers and ultra-thin absorbent cores.

Adult Care

Our product line for light and medium incontinence products are ultra-thin and highly absorbent with the comfort, flexibility and protection your consumers' needs.

PRODUCTS

APPLICATION	USAGE	BASIS WEIGHT g/m ²	PROPERTIES
Topsheet	Panty Liner and Sanitary Napkins	30 – 35	Natural, plant-based, biodegradable raw material, efficient liquid handling, various structure available, superior softness for excellent comfort
Acquisition Distribution Layer	Panty Liner and Sanitary Napkins	50 – 120	Fast and efficient liquid handling, good masking, softness and flexibility for excellent comfort, good embossing properties and printability
	Light incontinence Baby Diapers	40 – 70	Fast and efficient liquid handling, superior softness for excellent comfort, plant-based and biodegradable material
Absorbent Core	Panty Liner	90 – 150	Ultra-thin, flexible, low dust, true liquid absorption by SAP
	Sanitary Napkins	150 – 250	From ultra-thin to resilient and soft, excellent absorption, low dust, discretion in usage
	Incontinence	160 – 600	Maximized absorbency, high comfort through excellent wet stability, discretion in usage
Elastic Ear	Baby Diapers	20 – 30	Highly extensible and excellent recovery for the laminate, good mechanical strength, breathable, skin friendly and safe, plant-based material
Landing Zone	Baby Diapers	30 – 35	Resilient and soft, Transparent or opacity to fit need of appearance, Excellent "repeat" performance of hook and loop, plant-based or recycled raw materials, possibility to add a 3D structure
Backsheet	Baby Diapers	20 – 30	Breathable, skin friendly and safe, superior softness, good mechanical strength and dimensional stability, plant-based and biodegradable material
