SINGLE-SERVE COFFEE FILTERS

Glatfelter offers a comprehensive range of heat-sealable and non-heat-sealable coffee filter papers. They're perfect for use in hard pods, soft pads, bags, pouches and capsule filtration.

YOUR ADVANTAGES

- Excellent runnability and machine efficiency
- Taste neutrality
- Brewing properties that help create a perfect crema
- First-class extraction support
- Customized logo opportunities
- Highest quality hygiene and environmental standards

SUSTAINABLE SINGLE-SERVE COFFEE SOLUTION

Pair your certified coffee with our certified single-serve coffee filter papers. Glatfelter DYNAGREEN® was the category's first fully sustainable and renewable plant-based solution. It's made of compostable and biodegradable fibers such as PLA, abaca and cellulose and is EN 13432 certified. DYNAGREEN® is available for all common packaging lines.
